

Chilled Water Cooling Coil

- Designed for central AC and HVAC cooling applications
- Suitable for dry and arid regions with limited water availability
- Requires minimal water for cooling tower operation
- High heat transfer efficiency with advanced thermal engineering
- Manufactured in tube sizes: 3/8", 1/2", 5/8" OD
- Available with Blue fins coating for extended working life
- Corrosion-resistant construction
- Nitrogen pressure tested at 300–500 PSI to ensure leak-proof performance
- Abrasion-resistant and durable design
- Longer service life
- Coil replacement service available along with new supply
- Customized design solutions available

PRODUCT DETAILS:

Rows	1Row to 24Rows
Tube Diameter	1/2 inch
Tonnage	1TR to 200TR
Material	Copper
Coating	Color Coated
Usage/Application	For HVAC and Refrigerator
Coil Type	Chilled Water Coil
Work Pressure	200PSI
Applications	Air Washer, Ductable AC, FCU, Packaged AC, AHU
Material Of Construction	Aluminium Fins,Copper Tubing,Copper or MS Headers,Brass or Copper Distributors
