

L Shape Condenser Coil

PRODUCT DETAILS:

Usage/Application	AC
Material	Copper
Brand	TECHFLUX
Tube Thickness	27SWG
Working Pressure	450PSI
Tube Size	3/8" and 7mm
Capacity	1Ton to 10Ton
Pipe Material	Copper

- **High-Efficiency Copper Condenser Coils – Pan India Supply**
- We manufacture premium quality Condensing Coils for Split AC Outdoor Units, engineered for efficient heat rejection, durability, and long-term performance in residential and commercial air conditioning systems.
- Our condenser coils are manufactured using high-grade 7 mm and 3/8" copper tubing, ensuring superior thermal conductivity and reliable operation under varying climatic conditions.
- **Technical Specifications**
- Tube Material: High-quality Copper
- Tube Size: 7 mm & 3/8"
- Fin Type: Aluminium Fins
- Custom configurations available
- Suitable for Split AC Outdoor Units
- **Key Features**
- High heat transfer efficiency
- Durable and corrosion-resistant construction
- Optimized airflow design
- Long operational life
- Precision engineered for OEM and replacement applications
